

# The Honey Bee Quiz

**Instructions:** Press pen or pencil through the circle below your answer. Turn quiz over to check.

1. Honey bee's flying speed in MPH is

- 1      10      15      30

3. The number of trips from the hive honey bees must make to produce one pound of honey is approximately

- 60      600      6,000      60,000

5. The number of honey bees in a hive during mid summer is usually

- 5,000      10,000      20,000      40,000+

7. The number of flowers bees must collect nectar from to make one pound of honey is approximately

- 500      20,000      2million      5million

9. The number of flowers a bee visits on each trip from the hive is

- 10-50      50-100      100-500      500+

11. The average distance a honey bee travels on each trip from the hive is

- 10feet      2blocks      1.5miles      5miles

13. The number of honey bees that work their entire life to make one pound of honey is

- 10      50      100      500

15. The number of wings a honey bees has is

- 2      4      6      8

2. The number of eyes a honey bees has is

- 1      2      5      6

4. The number of sides each cell or compartment of beeswax comb where bees store the honey is

- 5      6      7      8

6. In the summer a honey bee will live for

- 3weeks      6weeks      2months      3months

8. The amount of honey one honey bee makes in her lifetime is

- .003oz.      .036 oz.      1 oz.      12 oz.  
(1/12tsp)      (1tsp)      (1tblsp)      (1cup)

10. The number of queen bees living in a colony at one time is

- 1      5      10      50

12. The number of calories in a teaspoon of honey is

- 3      9      21      33

14. The number of pounds of honey honey bees must eat to make one pound of beeswax is

- 1      2      8      12
